

SUBARU

INSTALLATION INSTRUCTIONS

PART NUMBER: E101EAJ500

DESCRIPTION:

Rear Bumper Protector

KIT CONTENTS:

Rear Bumper Protector x 1

1

Place the Trunk Lip Protector flat on the trunk floor with the Velcro fastening facing down. When not in use, the protector remains firmly in place.

2

When required, simply flip the protector into position so that it covers the vehicle's rear bumper. The rubber backing will grip the surface and resist movement while items are dragged across it.

Stow the protector before closing the trunk / rear gate.
